Catalogs, and MUCH More. World's largest selection!

Advantages

WHY BUY A TILT CAB INSTEAD OF A CONVENTIONAL CAB?

Carry more legal payload

Because center of gravity is closer to the front axle. (Since the law limits you in most cases to 20,000 lbs. at the rear, carrying more payload on the front axle keeps you legal and puts more profit in your pocket.)

Better visibility

This means safer operation of your vehicle.

Easy maintenance

Routine fluid checks at back cab.

Tilt cab tilt specially allows complete access to the engine, clutch, transmission, and other components.

Maneuverability

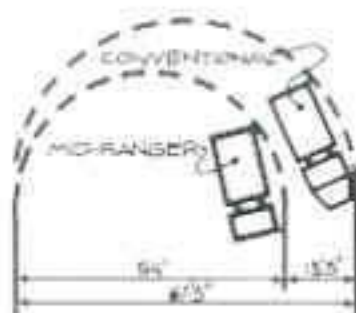

The shorter turning circle of a tilt cab makes maneuvering in narrow streets and around crowded loading docks easier for you.

Mid-Ranger curb-to-curb turning circle

180 inch Wheelbase - 57 feet (18.764)

190 inch Wheelbase - 57 feet (17.374)

205 inch Wheelbase - 61 feet (18.593)

WHY BUY A KENWORTH MID-RANGER INSTEAD OF SOMEONE ELSE'S TILT-CAB?

Better performance, better productivity

America's best known brand names make up our drive-train. You can rely on Kenworth, Cummins, Spicer, Fuller, Rockwell, and Goodyear for quality products and after-sale support.

Low maintenance

Highly fuel efficient

Easy to drive

High resale value

WARRANTY

The Kenworth T3710 was built tough and will perform tough. In fact, we're so sure of it, we've added this as a standard feature: one of the longest, most complete unlimited mileage warranties ever offered on a medium truck.

A warranty which covers*

12 months, unlimited mileage for the basic vehicle

24 months, unlimited mileage for the major components

30 months, unlimited mileage on cab corrosion penetration and cab structural defects

36 months, unlimited mileage on the frame, ax, crossmembers, and suspension (except springs and bushings)

It's an exceptional truck that could inspire this kind of warranty confidence.

But then, it's an exceptional truck.

*See the Kenworth warranty brochure for complete details. Restrictions and limitations apply.
