

Trucknology® means reliability.

The premium vehicles in the MAN Trucknology® Generation (TG) are currently the most up-to-date commercial vehicle programme in Europe. They set the benchmark for reliability and innovation. The TGL, "Truck of the Year 2006", stands for professionalism and productivity in 7.5 to 12 tonne trucks. The TGM, the midfield player from 12 to 18 tonnes, is in a class of its own. And the highlight in the weight class from 18 to 50 tonnes is the TGA – a truck with state-of-the-art design and engineering and with high performance in mobility and efficiency.

With their highly versatile axle variants, drive formulae (4x2 to 8x8) and engines our TG vehicles open up a new world of possibilities for you. For example, the TGA with MAN HydroDrive®, an engageable, hydrostatic front axle drive only available from MAN. To satisfy specifically military requirements we have developed diverse special equipment which will delight you. And we alone provide you with standard equipment which other suppliers cannot even provide as an extra. And all this in MAN's superior quality for maximum reliability wherever the road may lead.

MAN's mobile services – reporting for duty.

Cabs – ready for military service.

With TG cabs your wish is truly our command. They are available in every conceivable size, suitable for every requirement and transport assignment – ergonomic, practical and good. There are three cab options for the TGL and TGM – from the compact C cab to the L design through to the crew cab. The TGA offers you as alternatives the M and L cabs for local and regional service and the XL cab for long-distance assignments – all with military equipment and, of course, in the desired camouflage colours.

- Roof hatch for observation, in combination with a comfortably upholstered seat with a special standing surface on the folding back rest
- Rifle holders for the entire crew, within easy reach
- Military seats with washable covers and heavy duty damping for off-road operation
- Washable interior equipment
- Camouflage covers for windows and mirrors

Engineering with all the extras.

If it's the TGL and TGM or the TGA family, what always accompanies you is innovative technology combined with a high level of safety, exceptional payload capacity and high efficiency.

The dynamics of the modern MAN common rail engines in their interaction with the MAN TipMatic gearbox or smooth-shifting manual gearboxes for powerful propulsion are truly exceptional.

A harmonious powerpack as a holistic entity, better synchronised than any special forces team. Why not find out about the exceptional handling and great transport performance of the MAN Trucknology® Generation for yourself? Above all you will be impressed by the high degree to which these vehicles with their special equipment fulfil your military requirements.

- High fording depth in accordance with STANAG 2805
- Robust steel bumpers with headlight protection
- Camouflage lighting and convoy cross, convoy lighting in accordance with military regulations
- Fuel system according to military requirements
- Military towing eyes and shackles in front and rear
- Military trailer couplings at various coupling heights
- Electrics/electronics in accordance with military regulations (trailer electrics, external ignition, charging socket, sockets in the cab)
- Easy opening protective grilles for rear lights and headlights
- Movable entry step for off-road operation
- Massive radiator grille to protect against damage during off-road operation and stone impact in convoys

Everything at your command.

Equipped for tough missions.

When the going is tough, the tracks difficult and the climatic conditions extreme. When the terrain is treacherous and the assignment especially difficult – that's when Trucknology® trucks with special heavy-duty equipment really are in their territory. The available extras permit the MAN trucks to step up the pace with that bit extra mobility, robustness and reliability so that they can complete even challenging missions. After all, the only report we want to hear is: mission accomplished!

Optional heavy-duty equipment:

- Special fuel tanks
- Protective fuel tank plates
- Reinforced cab mounts
- Pre-separator in the air intake
- Fuel pre-filter with water separator
- Package for cold conditions
- Tropical accessories

Successful on the toughest test track in the world.

Scorching heat, violent sand storms, treacherous tracks. For others the Dakar rally is one of the last great adventures. For MAN it is above all the toughest test track in the world. The successes which we have brought home for years as the leading brand at the Dakar rally show that the race depends on MAN reliability. That's why all the works teams count on race service and support vehicles from MAN. Logistics are logistics.

But whether in military olive green, sand beige, camouflage spots or in the variegated colours on the rally the true winner is the MAN customer. Since we use the findings gained under extreme conditions to make our vehicles even better so that the military mission is perfectly fulfilled – mobility in pursuit of peace.
