

For almost 50 years, Ag-Chem™ equipment has been designed to meet the demands of professional applicators and innovative growers. From turbo-charged CAT® diesel engines to state-of-the-art cabs to common liquid system booms and plumbing, each RoGator® is designed from the ground up to do one job, and do it better than any other applicator in the industry. Our standards are always the same, whether for a custom applicator or a professional grower.

**RoGator® 884**

The **RoGator 884** is engineered from the ground up to give you the versatility you need to handle both pre-and post-emergent application jobs. Unsurpassed performance and reliability will keep you going from sunup to sundown. And Ag-Chem's state-of-the-art Advanced Application Cab has the most comfortable seats in the business. Not to mention 60 square feet of glass for unparalleled visibility and safety. The 884 is the only choice for value-conscious ag professionals.

## RoGator® SS884

The **RoGator SS884** takes value to an even higher level with its 275hp CAT® Tier III engine and revolutionary cab. Chemicals are discharged from rear-mounted booms, keeping them away from the engine to maximize performance and reduce the need for maintenance. Ergonomically designed to sustain the operator during the longest workdays, the SS884 features Ag-Chem's 6-post Advanced Application Cab for unobstructed, panoramic views. Easy flat-deck entry, powerful night lighting and perfectly placed controls further add to its value.

## RoGator® 1084

From the frame to the booms, the **RoGator 1084** is built to be tougher than any other sprayer in its class. Its exclusive C-channel frame absorbs shocks and flexes with field conditions. Increased tank capacity results in greater productivity and more efficient time management. Performance is maximized even further with tip-to-tip pressure accuracy, fast and easy reloading and an advanced boom leveling system. The 1084's sophisticated boom racking design provides a clear view of traffic for optimal on-road travel. All told, the 1084 is the perfect machine for the most challenging conditions.

RoGator® SSc1084

## RoGator® SSc1084

Whether you're applying liquid or dry material, we've got you covered. The **RoGator SSc1084** is the only row crop machine in the 1,000-gallon market that offers a true combo. You can change from liquid tanks to dry boxes in as little as half a day, quickly putting you back in the field. Two conveyor options handle a wide variety of products, including heavy material like lime. Our exclusive C-channel frame absorbs shock and flexes with field conditions, comfortably rolling you through the most daunting terrain. Adjustable track widths, interchangeable application options and advanced technology combine to make the SSc1084 the top choice for ag professionals everywhere.

**RoGator® 1286C**

Weeds, insects and crop disease don't wait for dry fields. With the **RoGator 1286C** you won't have to either. The 1286C features a 6-speed drive package that will allow you to match speed to field conditions more efficiently. A broader range of speed-to-RPMs, coupled with a powerful 311hp CAT Tier III C-9 engine, results in maximum productivity, so you're losing neither time nor power. Performance upgrades, like the GatorTrak 4-Wheel Steer, provide even more versatility to enhance performance. The state-of-the-art Advanced Application Cab makes the 1286C a comfortable ride no matter how tough the conditions or long the day.

## **One Unified, Innovative Dealer Network.**

In today's complicated, fast-paced business environment, you demand greater, more efficient service.

That's why Ag-Chem application equipment comes with a sophisticated, single-source network of dealers that can handle all your needs. From the new machinery sales process through after-the-sale parts, maintenance and full-service support, your dealer will be there to make sure everything is perfect.

Our dealer network offers the most extensive mobile service network in the industry, providing maintenance, fast on-site repair and next-day part drops that will keep you rolling during the critical production seasons. It's the dealers' mission to provide the most advanced and timely service solutions, allowing you to maximize

uptime, manage the cost of ownership and maximize revenue, so you can maintain your peace of mind.

In addition, your dealer will provide predictive maintenance services like oil and coolant analysis in order to identify what's going on inside your equipment. This helps you prevent problems before they happen.

For more than half a century, Ag-Chem has built a reputation as the leader in the manufacture, sale and service of equipment used to apply liquid and dry fertilizer, crop protection products and biosolids.

Together with our dealers, we're determined to uphold that reputation in the next half-century and beyond.

## **One Source for Replacement Parts. Done.**

Productivity is serious business no matter what the job or application. That's why every RoGator is built from the ground up with the highest quality Ag-Chem parts.

That's also why we provide a simple, one-stop source for RoGator replacement parts: SprayParts.com. So when you need to replace one of them—whether it's a consumable item or a wear item—there's no easier way to do it than at SprayParts.com.

To keep your machine in tip-top condition, SprayParts.com has the parts you need, when you need them. And we'll always give you a choice, whether it's an original Ag-Chem part or a perfectly compatible part from another manufacturer. Either way, you'll know the part will be the right one for your machine.

When you need a part fast, SprayParts.com is there—24/7. In most cases, parts ordered by 4 p.m., in season, can be delivered to a convenient location the very next morning.

**Simply put, our commitment to you doesn't stop once you take delivery.**

### **When Every Bushel Matters—**

Today we face an unprecedented era of rising crop input prices and availability, complicated by an ever-increasing demand to improve yields. Not to mention 600 species of insects and 1,800 species of weeds evolving daily to torment agriculture professionals.

To meet global food and fuel demands, while protecting their own profit margins, North American farmers know the importance of fertilizers, nutrients and pesticides in maximizing their crop yields. This is why they insist on state-of-the-art technology, comfort and product delivery mechanisms in their equipment.

Ag-Chem is committed to building and offering the very best line of precision application tools and technology—at an unparalleled value. You can be sure the right amount of material is placed, in the right place and at the optimum rate to yield maximum benefit. Regardless of how challenging the field conditions may be.

Because more than ever before, every bushel counts.
