ROUTE-READY

STEP-VANS

roomy, rugged bodies

on tough

Forward Control chassis!

Six big Chevrolet Step-Van models for '61—each one ready for rugged routes with a durable body and tough Forward Control chassis supplied by Chevrolet as one complete unit! Savings begin the minute you touch the starter, thanks to the famous-for-economy Thriftmaster Special 6. And big, profitable cargoes ride easy, with G.V.W.'s ranging from 5,600 to 10,000 lbs.

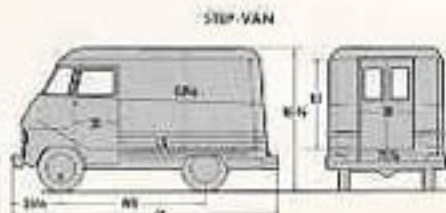

Step-Van loading or unloading is quick and easy with a load compartment that's lined throughout with smooth 24-gauge steel panels. There are no projections to interfere with cargo packing. Wheelhousings' rectangular design adds to load area. The spacious interior is fully protected by insulated and watertight body construction.

Double rear doors with big 38" openings are standard; extra-wide 60-inch and 72-inch openings are optional at extra cost. You can count on hefty body protection, too, with a husky U-channel bumper that does double-duty as a handy load compartment step. With dozens of built-for-work features such as these, you can be sure a 1961 Chevrolet Step-Van is your best answer to dependable, low-cost, on-schedule route deliveries.

MODEL P2545 Forward Control chassis with Chevrolet's 18-ft. Step-Van Body.

CHASSIS DIMENSIONS

MODEL	WB	CL	LS
P1345-P1345	108	183 1/4	94
P2545-P2545	125	212 1/4	119

CHOOSE FROM THREE BODY LENGTHS

WHATEVER YOUR DOOR-TO-DOOR DELIVERY CHORE, you can get a 1961 Chevrolet Step-Van body that's sized right to do it right! Bodies are available in three lengths—8, 10 and 12 feet. Models P2345 and P3345 offer an 8-foot body length on a 104-inch wheelbase. Models P2545 and P3545 come equipped with a 10-foot body on a 125-inch wheelbase. Models P2645 and P3645 carry a 12-foot body on a 137-inch wheelbase. You can choose the body length that suits your work to a "T."

COMFORTABLE DRIVER COMPARTMENT ADDS TO DRIVER EFFICIENCY

Easy visibility stems from the full wraparound windshield, equipped with extra-long heavy-duty wipers for safer working in wet weather. There's plenty of leg and head room, too, with a big walk-in doorway 66 inches high (low step height and anti-skid floor mats make entry and exit easier and safer). Thorough insulation on body side panels, roof and underbody keeps cab comfortable and quiet.

Extra-cost options include a foam rubber driver's seat, second seat for driver's helper (chair or folding type) and a partition that closes off load area. Scores of features such as these help keep drivers safe, comfortable and efficient.
