Automobile - Truck - Motorcycle 1900 to Present  
ORIGINAL Sales Brochures, Manuals, Books, Posters,  
Catalogs, and MUCH More. World's largest selection!

## UNIQUE DESIGN BENEFITS

If you need a truck that has been designed to lower your operating costs and help you achieve a better bottom line, then the Kenworth T300 is the truck for you. Developed for local distribution, agitator and tipper applications, the T300 offers the same reliability and durability that Kenworths are renowned for. Driving around town the T300 will give you a level of visibility and manoeuvrability unique in a bonneted truck.

## DRIVER COMFORT

Designed to be big on strength and low on unnecessary weight the cab is built around a corrosion resistant frame, and offers the professional driver easy access and all round comfort.

Vital functions fall readily to hand without the need for excessive movement or distraction. Interior trim is mounted over high density foam insulation that minimises in-cab noise and heat, adding to driver comfort.

## ADVANCED TECHNOLOGY

The T300 offers the best of North American engine and drive line technology in a delivery vehicle with performance characteristics that will optimise operating costs and efficiency.

The specialist needs of urban delivery operators such as refrigerated freight, tanker and general freight can all be met by the T300.
