

## 60" Mid-Rise Sleeper

When the road calls, this is how you answer.

### You'll be riding on some highly advanced engineering.

Mack® highway trucks have plenty of new features to deliver impressive performance. Tight turning geometry helps to optimize maneuverability. Less interior noise and vibration help to combat driver fatigue. Thanks to lighter components, you can add more payload and generate more profit. And Mack highway trucks give you spec'ing flexibility so you can build a vehicle that precisely matches your application.

### We aren't comfortable until drivers are.

This spacious sleeper is available on both CH and Vision™ models. It's ideal for drivers spending more time in their trucks due to the new hours of operation rules. They get the storage and stand-up room of a bigger sleeper in an economical 60" size. Drivers have a console with a drawer, storage shelves and pull-out table top ideal for doing paperwork. A custom refrigerator is optional. There's a tall closet featuring a lower shelf to separate clothing from boots. There's also plenty of lighting, ample 12-volt outlets and convenient rear controls for HVAC, lighting and stereo speakers. Drivers will be happy to find a full-sized 35" mattress so they can rest more comfortably. The lower bunk has lift-up, locking storage and there's additional room under the bed.

*One minute, it's a comfortable sleeper; the next, it's a mobile office.*

## **Local and regional haul is a Mack specialty.**

If you need a sleeper cab for local and regional hauling, there's no better choice than Mack. There are two flat-top sizes — 48" and 56". The two mid-rise sizes measure 60" and 70". All these sleepers promote economical operation and unmatched driver comfort no matter how short or long the run. You can count on the advanced technology behind our ASET™ AC engine to provide all the horsepower and torque you need for the highway. The Mack Integrated Powertrain covers six components with one warranty to provide single-source responsibility.

## **Hundreds of dealers looking out for you.**

Mack has one of the strongest, most responsive dealer networks in trucking. It's been thoughtfully structured to make sure you stay up and running. Our OneCall® CompleteCare customer support network is staffed with Mack trained technicians and service representatives who know your specific truck. Just call 1-800-866-1177 for immediate assistance. Sophisticated parts distribution centers use a high-tech tracking system to instantly locate parts and move them quickly. Drivers can take advantage of longer service hours, fast turnarounds and new technologies that help us work with you better.
