PowerShift

## Comfort. Convenience. Control. The Axor X just gives you more.

The Axor X is everything you might expect from Axor. Tough, reliable and economical, it's a truck that just gets the job done. But the Axor X does all of that with a little bit more style and comfort than you might expect.

We've added a multi-adjustable air sprung seat for those longer journeys. A blue-tooth-enabled stereo for your enjoyment.

Mercedes PowerShift as standard for your ease, convenience and safety. And that's all just for starters. When you add to these already impressive features the reassurance of a Mercedes-Benz 2-year Repair & Maintenance service contract, you'll understand why Axor X is a truck that's not just built for business, but built for drivers.

## 2-Years' Repair & Maintenance

It's not just the physical features of the Axor X that make it that bit more appealing. It's the addition of a 2-year Repair & Maintenance service contract (up to 160,000km per annum). Along with the annual MOT test fee and all ministry inspections, this generous contract covers all of the truck's routine maintenance requirements. It doesn't stop there. Additional mechanical repairs, including the replacement of everyday wear and tear items, and 24 hour emergency roadside assistance are also included – giving you peace of mind, as well as a great deal.

## Economy

There are many reasons that Axor is a favourite amongst some of the UK's largest fleet operators, but fuel economy is high on their list. Now with Axor X we've made it even more economical to run. Special air deflectors help reduce fuel consumption further. The addition of the frugal Euro 5 engine as standard will save you up to £500 of road tax a year (for vehicles registered up to October 2009). Choose the 4x2 model, and you'll benefit from even better fuel economy thanks to the addition of aerodynamic side skirts, designed to reduce drag. It's a truck that just makes better business sense.

## Mercedes PowerShift

More relaxed, safer and economical driving. With Mercedes PowerShift as standard in the Axor X, that's exactly what you can look forward to. With 12 forward and 2 reverse gears, special manoeuvring mode, hill kick-down and direct shift from 1st to reverse, Mercedes PowerShift delivers easier, more precise gear changes, smoothly and economically. With an arm-rest mounted control and simple one-press function button on the dashboard, you can concentrate on the road ahead, not distracting gear changes. Simply select your mode and away you go. And all with a reduced gearbox weight too, so adding to potential payload.

The Axor X is packed with intelligent features, all designed to make your life easier, more comfortable and more economical.

### Convenience and Economy

#### Mercedes PowerShift

Fully automated direct-drive gearbox with 12 forward gears and 2 reverse gears. The arm-rest mounted control and simple one-press button on the dashboard give fingertip gear control, for simple, safe and economical driving.

#### BlueTec 5 Engine

Delivering fuel efficiency, ample power and lower emissions. Plus, for vehicles registered before October 2009, a substantial saving on road tax.

#### Air Deflectors – Roof and Sides

Height-adjustable roof-mounted air deflector and side deflectors improve aerodynamics between the cab and body.

#### Jost Sliding Fifth Wheel

Convenient fifth wheel that makes it easier to couple up but also allows for maximum aerodynamic efficiency by reducing the cab gap to an absolute minimum.

### Aerodynamic Side Skirts

#### (4x2 only)

Closed, aerodynamic side skirts fitted to both sides of the vehicle. Designed to reduce drag and, hence, fuel consumption.

### Comfort

#### Driver Comfort Seat

Designed with driver comfort and safety in mind, this seat can be easily adjusted to accommodate every driver.

#### Top Bunk

Folds away when not in use, for maximum comfort at night and maximum space during the day.

#### Air Conditioning

Extends the heating and ventilation system with an effective, quiet cooling system.

#### High Roof Sleeper Cab

Enjoy the feeling of more space within this truck, which includes an electric sunroof with tinted glass and sunscreen.

### Added Extras

#### Bluetooth Stereo

No wires. No hassle. You can listen to music or make calls more easily with a bluetooth phone.

#### CD Storage Box

For tidy storage and simultaneous protection of CDs against the effects of light, heat and dust.

#### Brushed Steel Effect Trim

High-quality steel effect trim that frames the switch control panel and instrument cluster surround.
