

For almost 50 years, **Ag-Chem™** equipment has been designed to fit the demands of custom applicators and innovative growers. Each TerraGator® is designed from the ground up to do one job and to do it better than any other applicator in the industry.

TerraGator® 6203

Keep your costs down and your productivity up with the **TerraGator® 6203**—a rugged, versatile machine designed for use with a 1,800-gallon liquid system or a dry spinner spreader. The CAT® C-9 Tier III turbo-charged diesel engine delivers a whopping 311hp through an 11-speed TerraShift™ transmission. Combine that with a 165-gallon fuel capacity and you'll easily stay in the field until the job is done.

TerraGator® 8203

Extensive product development and testing have made the **TerraGator 8203** the workhorse of the Ag-Chem™ fleet. Its rugged chassis delivers unmatched performance and durability. The TerraShift™ transmission and the electronically-controlled CAT C-9 Tier III turbo-charged diesel engine deliver 330hp where you need it—all in a highly responsive, fuel-efficient platform.

TerraGator® 8204/8244

You won't find any truck axles on a **TerraGator 8204/8244** chassis. Rugged Axle Tech™ off-road axles, designed for use with flotation tires, carry any load with strength and stability. In fact, they handle the highest load ratings in the industry. This series also boasts four-wheel drive performance for reduced wheel slip on soft fields and better traction on rolling terrain. And the dynamic, load-sensing steering features an anti-kickback design that keeps the shock loads of rough ground from transferring from the axles to the steering wheel and the operator.

TerraGator® 9203

The numbers speak for themselves: an imposing 425hp CAT C-13 Tier III turbo-charged diesel engine; an impressive 24-ton load rating, and an incredible 2,400-gallon liquid system, or 8.8-ton dry capacity, are all at the heart of the TerraGator 9203. Comfort and control features in Ag-Chem's state-of-the-art Advanced Application Cab and a 200-gallon fuel tank let you stay in the field longer, giving you maximum return on your investment and increased application revenue.

TerraGator® 9205

TerraGator® 9205

The **TerraGator 9205** is the ultimate solution for application outputs using either solid or liquid materials. Power for the 9205 comes from a CAT C-13 Tier III turbo-charged diesel engine. To pull big loads up hills or through soft spots, it's loaded with the latest technology in power and torque, making your machine easy to maneuver and fuel-efficient, too.

TerraGator® 3244

The TerraGator NMS 3244 combines the performance of a CAT C-11, Tier III turbo-charged diesel engine with a new chassis design that can handle an incredible 4,755-gallon liquid tank or an 18.5 cubic yard dry box. This chassis design features Axle Tech™ axles that allow the machine to work with dual wheels in row crops. In our minds, the 3244 is the beast of our fleet.

Even the longest days seem shorter—

Long hours, rough terrain and miles of road travel take a toll on the machine and its operator. That's why efficiency and performance are the foundation of every TerraGator. Durability, comfort and safety are engineered to maximize productivity and simplify operation. From the turbo-charged CAT diesel engines to the state-of-the-art Advanced Application Cab, these babies are designed to provide the most comfortable ride in the industry.

One Unified, Innovative Dealer Network.

In today's complicated, fast-paced business environment, you demand greater, more efficient service.

That's why Ag-Chem application equipment comes with a sophisticated, single-source network of dealers that can handle all your needs. From the new machinery sales process through after-the-sale parts, maintenance and full-service support, your dealer will be there to make sure everything is perfect.

Our dealer network offers the most extensive mobile service network in the industry, providing maintenance, fast on-site repair and next-day part drops that will keep you rolling during the critical production seasons. It's the dealers' mission to provide the most advanced and timely service solutions, allowing you to maximize uptime, manage the cost of ownership and maximize revenue, so you can maintain your peace of mind.

In addition, your dealer will provide predictive maintenance services like oil and coolant analysis in order to identify what's going on inside your equipment. This helps you prevent problems before they happen.

For more than half a century, Ag-Chem has built a reputation as the leader in the manufacture, sale and service of equipment used to apply liquid and dry fertilizer, crop protection products and biosolids.

Together with our dealers, we're determined to uphold that reputation in the next half-century and beyond.

One Source for Replacement Parts. Done.

Productivity is serious business no matter what the job or application. That's why every TerraGator is built from the ground up with the highest quality Ag-Chem parts.

That's also why we provide a simple, one-stop source for TerraGator replacement parts: [SprayParts.com](https://www.sprayparts.com). So when you need to replace one of them—whether it's a consumable item or a wear item—there's no easier way to do it than at [SprayParts.com](https://www.sprayparts.com).

To keep your machine in tip-top condition, [SprayParts.com](https://www.sprayparts.com) has the parts you need, when you need them. And we'll always give you a choice, whether it's an original Ag-Chem part or a perfectly compatible part from another manufacturer. Either way, you'll know the part will be the right one for your machine.

When you need a part fast, [SprayParts.com](https://www.sprayparts.com) is there—24/7. In most cases, parts ordered by 4 p.m., in season, can be delivered to a convenient location the very next morning.

Simply put, our commitment to you doesn't stop once you take delivery.

When Every Bushel Matters—

Today we face an unprecedented era of rising crop input prices and availability, complicated by an ever-increasing demand to improve yields. Not to mention 600 species of insects and 1,800 species of weeds evolving daily to torment agriculture professionals.

To meet global food and fuel demands, while protecting their own profit margins, North American farmers know the importance of fertilizers, nutrients and pesticides in maximizing their crop yields. This is why they insist on state-of-the-art technology, comfort and product delivery mechanisms in their equipment.

Ag-Chem is committed to building and offering the very best line of precision application tools and technology—at an unparalleled value. You can be sure the right amount of material is placed, in the right place and at the optimum rate to yield maximum benefit. Regardless of how challenging the field conditions may be.

Because more than ever before, every bushel counts.
