

# Hatehof

When lives depend on quality

## Aircraft Refuelers

For over 60 years, Hatehof has manufactured high quality, robust and reliable aircraft refuelers for top level military and civilian clients around the world.

# Aircraft Refuelers Technical Specifications

Providing full design and manufacturing services for fast, efficient and safe military and civilian aircraft refueling, Hatehof's solutions are custom-made in truck mounted tanker, independent semi-trailer or full trailer versions. In addition, specific models are especially designed to be fully air transportable by C-130 Hercules aircraft.

Hatehof aircraft refueler tanks are tailor made to hold from 3,000-60,000 liter capacities, and come with 350-3,000 liter per minute pumping ability.

Each vehicle can be designed in 6x6, 6x4, 4x4 or 4x2 option for on- or off-road usage.

Hatehof offers a wide choice of features and accessories such as meters, hose reel, micronic water separator, interlock system, dead-man control, bottom loading, under-wing and over-wing nozzles, hydraulic lift and all necessary refueling equipment.

**Hatehof's products conform to the highest international airline standards - AQAP 2110 and NSPA 407 – and all manufacturing processes are ISO 9001 certified.**

For chassis, engines and transmissions, Hatehof works with the world's leading manufacturers according to clients requests.
