

THE KENWORTH C500

**Meet the C500
versatile, durable
and strong**

The C500. Suited to applications requiring strength, maneuverability and dependability.

The C500. Suited for construction, mining, logging, petroleum and refuse industries.

The C500. Most importantly, can do your job efficiently and dependably.

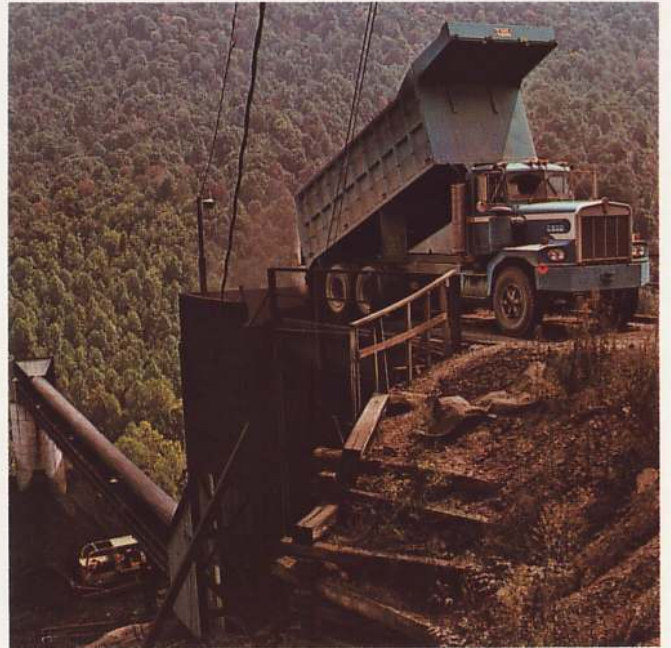

The C500. A quality truck.

Kenworth... Strength and stamina

Few operations punish a truck more than the steep grades, ruts, chuck holes, dust and mud of the coal fields.

Here is where the quality of the C500's rugged cab and frame construction pay off through long life and minimum down time.

Kenworth... Custom engineered for efficiency

The C500 can be built with many quality features that make mounting a concrete mixer body easy.

The mounting package is designed to accommodate the most popular 6 to 10 cubic meter mixers on the market.

If you have a special application or requirement, Kenworth's engineers will work closely with your body manufacturer to optimize strength and weight distribution and facilitate auxiliary equipment installation.

Kenworth... Dependability

A truck is only as good as the amount of time it spends on the job.

That is why the C500 includes so many standard quality features that provide quick and easy maintenance to make sure your C500 spends its time on the job, not in the shop.

Not only do the C500's quality features provide quick maintenance, but long life too.

In the oil fields. Kenworth's custom engineering pays off. Rugged strength and dependability, coupled with high performance, make Kenworth a highly regarded name throughout the world. High availability and ease of service are contributing factors in a profitable operation.

Kenworth... Driver approved

The C500's quality construction and custom engineering provide a truck that is comfortable and easy to operate.
