

UPGRADE YOUR TRUCK'S APPEARANCE AND PERFORMANCE

...INSTALL CLARIBEN FIBERGLASS TILT HOODS

UPGRADE YOUR TRUCK'S APPEARANCE AND PERFORMANCE ... INSTALL CLARIBEN FIBERGLASS TILT HOODS

Truckers can modernize their older model trucks by installing the Clariben fiberglass tilt hood. These hoods are hand laminated and positively will not warp or crack because they are made of the highest quality materials and methods available. Hand detailing assures precision fit to the frame.

With Clariben unitized tilt hoods, you get more pay-load. Clariben hoods weigh much less than steel (approximately 50% the weight or less). Service downtime is drastically reduced because all Clariben hoods allow 100% access to the engine compartment for repair, service and inspection. The hood tilts open easily and quickly, saving time while checking water, oil and other maintenance items. Clariben hoods are spring

mounted to eliminate vibration shock. Lamp damage is eliminated after installing a Clariben fiberglass tilt hood.

Clariben tilt hoods also provide important safety factors. The fiberglass shatters upon impact. There is no metal to bend and no dangerous flash after a collision. The fiberglass is easy to repair economically.

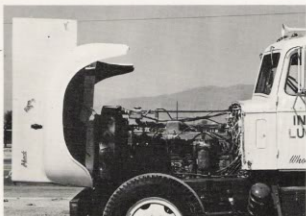

Clariben hoods are rigid, one-piece construction. This eliminates irritating and dangerous loose fenders or hood hatches. They can be painted any color desired. All Clariben hoods are delivered already prepared with a special primer coat. Clariben hoods retain their good looks far better than metal. They are extremely durable and weather far better than metal.

CLARIBEN HOOD ADVANTAGES

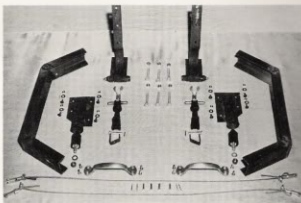

- less weight — more pay-load
- easier and cheaper to repair
- no oxidation — retains appearance
- 100% access — less overhaul downtime
- no vibration — no shock damage
- shatters upon impact — no metal flash

SPECIFICATIONS

- Resin Gravity** — 1.6 — 1.7 heavier than water
Flex Strength — 35 lbs. psi
Compression Strength — 22 — 28,000 lbs. psi
Impact Strength — 15-20 ft. lbs. psi
Weather Resistance — from —40°F to maximum desert temperature
Heat Resistance — withstands continuous temp. to 250°F

COMPLETE ACCESS — Clariben hoods offer immediate and complete access to the engine compartment. Service and overhaul downtime is drastically reduced.

COMES COMPLETE, EASY TO INSTALL — Clariben hoods come complete with all installation hardware. Each hood is packed with easy to follow instructions.

A COMPLETE LINE OF QUALITY FIBERGLASS HOODS FROM CLARIBEN

Clariben makes a complete line of fiberglass hoods for older model trucks. Each model is tailor made for its corresponding truck model. Each fits precisely. Check the factory for truck

model hoods not listed here since we are constantly designing new models. Upgrade your fleet now with Clariben quality fiberglass hoods.
