

Mack

model EH chassis

C-2476

RECOGNIZED throughout the industry for their performance ability, economy, stamina, reliability and long life, Model EH trucks continue to merit new laurels. With war-born improvements in its powerful engine, an improved clutch and many refinements in its highly-developed transmission and rear-axle, performance surpasses anything previously attained.

Important improvements have been made in the cooling system, effecting closer maintenance of temperatures with conservation of coolant and virtual elimination of corrosion.

Its massive frame has been still further strengthened, axles are sturdier, its Shock-Insulated springs are tougher, yet more flexible, brakes more powerful and durable and steering easier and more responsive.

MODEL EH SPECIFICATIONS

MAXIMUM GVW: 24,000 lbs.

WHEELBASES: 146", 158", 176", 194", 212" or 230"

TIRES: 10.00-22, dual rear, maximum

WHEELS: Open spider type, malleable iron, six spokes

ENGINE: Six cylinder, L-head

Bore and Stroke, 3 7/8 by 5 inches

Piston displacement, 354 cubic inches

Horsepower, 121 @ 2700 r.p.m.

Torque, 270 pound-feet @ 1400 r.p.m.

Cylinders, cast in block with one-piece detachable heads

Valves, intake, Silicon-chromium steel, 30-deg. face, 1.49/64"

Exhaust, Stahlite, sodium cooled and faced with Eatonite, 45-deg. face, 1-7/16"

Exhaust seat inserts, Permafit of Niferrite, Stellited

Pistons, H-slot, aluminum, tin plated

Crankshaft, seven bearing, Tocco case-hardened, with twelve counterbalance weights

Connecting rods, I-beam, drop forged, 35° cap angle

Air cleaner, oil bath type

Water pump, centrifugal at front of engine

Thermostat, warm circulation type

Fan, 21", pressed steel, two 57/64" V-belts

Radiator, continuous-finned, flat-tube, Mack Anti-spill type with pressure cap

CLUTCH: Single I-plate, dry

Area of engagement, 202 square inches

TRANSMISSION: Five-speed or ten-speed Mono-shift; selective, constant mesh

RATIOS

Shift	5-Speed		10-Speed Mono-shift	
	Fast Range	Slow Range	Fast Range	Slow Range
5th	1.00	1.00	1.29

Mack

MODEL
TRACTOR

EHT

LONG recognized throughout the trucking industry for its performance ability, economy, stamina, reliability and long life, the Mack EHT tractor is especially designed for tractor work, for which it is well adapted by reason of its ruggedness and power.

Compact and highly maneuverable, this tractor offers driver comfort notwithstanding, both as regards ease of riding and cab comfort. Its brakes are both powerful and durable and steering positive and easy.

Among the many advances made in the power-plant are included cooling system improvements of particular advantage in strenuous tractor-trailer haulage, while an improved ratio pattern in the transmission is salutary both as regards performance and economy.

Mack

model EHX dumper

Y10611

EXPRESSLY developed for dump work of all kinds, this model has all the indomitable ruggedness for which the Model EH chassis is celebrated plus a special frame with reinforced side-members and a special arrangement of box-girder cross-members to adapt it to the rigors of dumping service.

Wheelbases, too, are especially adapted to standard dump body lengths. With its powerful 354-cu. in. engine, choice of heavy-duty five-speed or ten-speed Mono-shift Duplex transmission and a rugged Mack Dual Reduction rear axle, it combines strenuous performance capability with compactness, short-turning ability and the stamina, durability and economy synonymous with the name.

Mack

MODEL CHASSIS EQ

C-1000

SEVERE duty requirements are met thrifitly and dependably by this husky member of the Mack family. Powered by the valiant EN 354A engine and driving through improved five- or ten-speed transmissions incorporating the advanced gathered ratios with direct in high, this chassis has the famous Dual Reduction rear axle, with spiral-bevel and helical gears of Tetrapoid and Orthopoid type.

Stamina and durability are outstanding in its box-girder-braced frame, robust front axle and steering system, massive air brakes, oversize clutch and driveshaft and the substantial cab, hood and fenders.

Mack

model EQSW
SIX-WHEELED
chassis

C-2088

FEATURING the Mack Balanced Bogie, this six-wheeler offers impressive capacity with compactness, thrifty operation and agile performance. It drives on all four rear wheels by a straight through drive, employing Mack's perfected Power Divider between the driving axles, thus providing positive traction under all conditions while protecting driving parts from concentrated stress and prolonging tire life.

Powered by the 354-cu. in. Mack L-head engine which has earned such an enviable reputation, the chassis is available with either a five- or ten-speed transmission. The latter is the sensational Mono-shift Duplex type. All springs are carried in Mack rubber Shock Insulators and the powerful air brakes offer exceptional lining area for durability.
