

# **Mack<sup>®</sup>**

## **Vision<sup>™</sup> DayCab**

**Spec'ing versatility for  
practically any application.**

# The Mack® Its flexibility just might

## **Spec it your way for your application.**

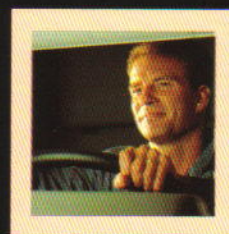

■ You run a van trailer down busy highways. Or maybe you pick up shipments of milk at remote dairy farms. Or deliver gravel to rocky, pothole-filled jobsites. The Mack® Vision™ DayCab can be spec'ed to handle any of those applications and more. This axle-back vehicle lets you choose from Mack or supplier axles, transmissions or suspensions. For highway applications, the Vision DayCab can be spec'ed with a lightweight MaxAir™ suspension, 12,000-lb. front and 40,000-lb. rear axles. For flatbed, dump trailer and heavy bulk hauling, you have a choice of two frames, inside channel reinforcement, and 14,600-lb. front and 46,000-lb. rear axles complemented with heavy-duty Mack suspensions and transmissions.

## **We kept it really light.**

■ Using a combination of advanced materials and smart engineering, Mack was able to build one of the lightest day cabs on the road today. Get more productivity, more payload and a lower overall operating expense. The fairings are made from lightweight composite materials. The 113-inch bumper-to-back-of-cab reduces weight while giving drivers better maneuverability. In short, every component on the Vision DayCab was evaluated to determine where weight could be saved without sacrificing durability.

## **This truck will help you see better.**

■ Driver visibility was a prime consideration when we designed this truck. The Vision DayCab provides unmatched forward visibility thanks to a sleek, sloping hood. Specially designed doors provide excellent side visibility, and a large peep window helps with parking or maneuvering through traffic. An aerodynamic design slices the wind, giving you better fuel economy.

# ision™ DayCab. t be its greatest strength.

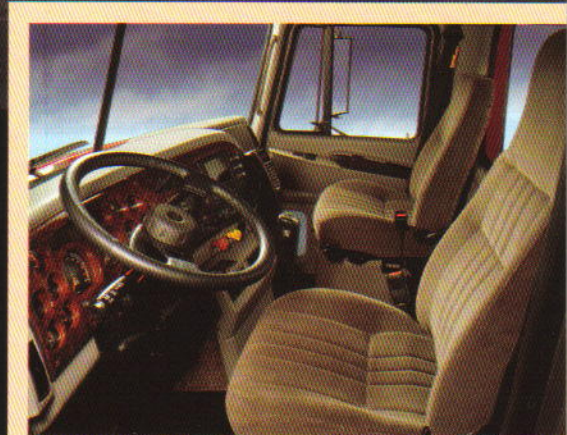

## Amazing efficiency — courtesy of Mack electronics.

Because you're continually pursuing a lower cost-per-mile, you'll love Mack electronics. Our time-tested and road-proven V-MAC® electronics is an advanced, fully-integrated system that lets you program hundreds of vehicle and engine functions for more efficient operation. Our optional Vehicle Information Profiler (V.I.P.™) with its large, in-dash display gives drivers and fleet managers valuable data on fuel economy, engine performance, miles traveled and much more. GuardDog™ is an optional maintenance system providing predictive oil change information and other real-time data on fuel levels and brake shoe wear. All to help you squeeze more money out of every mile.

## We weren't comfortable until we were sure you would be.

This cab was designed for drivers. Sit inside and you'll find a modern layout with generous amounts of leg and belly room. The dash is ergonomically designed so all important controls are within easy reach. No uncomfortable stretching. Electronic gauges have race-type, 12 o'clock needle positioning for easy reading that helps reduce eyestrain.

## Drive knowing you have a safety net the size of a continent.

When you have a problem, the last thing you need are hassles. The first thing you need is fast, reliable single-source help. The Vision DayCab comes with the peace of mind and all the benefits of our exclusive OneCall™ CompleteCare customer support network. Simply dial one number — 1-800-866-1177 — and you'll be connected to service professionals trained in Mack factory schools. All to help you get up and running faster.

You want a truck that you actually look forward to climbing in the cab each morning and turning the ignition. A machine where a day's worth of driving seems to fly by. You want a day cab with the same comfort and sleek lines those big sleepers have. You're in luck. Mack has just what you're looking for.
